J-80 and VX One Design Base Ratings. Perspective owners have requested preliminary ratings for a J-80 and a VX One Design. They are expecting to take delivery within the next several weeks. Information on these new boat designs is limited. As a matter of policy the Committee does not issue a rating until the owner has possession of a boat. Thus the Committee will wait until delivery and arrive at a base rating for each of these classes based on the information available at that time. (Closed)

Rating Reviews/Rating Appeals - None

Average is the arithmetic mean and is calculated by adding a group of numbers and then dividing by the count of those numbers.

For example, the average of 2, 3, 3, 5, 7, and 10 is 30 divided by 6, which is 5.

Median is the middle number of a group of numbers; that is, half the numbers have values that are greater than the median, and half the numbers have values that are less than the median. For example, the median of 2, 3, 3, 5, 7, and 10 is 4.

Mode is the most frequently occurring number in a group of numbers. For example, the mode of 2, 3, 3, 5, 7, and 10 is 3.
